

Calendar of Forthcoming Electronics Fairs/Exhibitions/Seminars/Events

Event, Date and Venue	Topics	Contact for details
NEPCON China 2025 APR 22-24, 2025 Shanghai World Expo Exhibition & Convention Centre, China	NEPCON China is a leading B2B event that converges global circuit board assembly and advanced solutions suppliers that serve the electronics, semiconductor, automotive, and new energy industries. The concurrent highly interactive events include conferences, competitions, award programs and business matchmaking.	Website: https://www.nepconchina.com/en-gb.html
EFY Expo Pune May 15-17, 2025 Auto Cluster Exhibition Centre, Pimpri, Pune	Electronics expo with conferences on automotive electronics, EVs, and Industry 4.0 (IIoT). Covers a wide range of electronics-related technologies, products, and topics, including electric drives, battery management systems, and IIoT solutions.	Website: https://www.efyexpo.com/PUNE
NEPCON ASIA 2025 October 28-30, 2025 Shenzhen Convention & Exhibition Centre	Asia's leading exhibition for electronics R&D, manufacturing and packaging technology. It consists of six shows specialised in essential areas for electronics manufacturing and R&D. The show has increased its value as an exhibition representing Asia's leading one-stop venue for all those involved in the electronics industry.	Website: https://www.nepconasia.com/en-gb.html
Open Source India November 5-6, 2025 NIMHANS Convention Centre, Bengaluru	The twenty-second edition of Open Source India (OSI) maintains its ethos of bringing various stakeholders under one roof. The team at Open Source For You magazine, in partnership with India's Open Source community and industry, come together to accelerate development and deployment of Open Source in India and beyond.	Website: https://www.opensourceindia.in
productronica November 18-21, 2025 Trade Fair Center Messe München, Germany	This event presents the entire range of technologies and solutions for electronics production and provides in-depth insights into the latest trends in practice-oriented forums and live demonstrations. Every two years, the world of electronics production meets in Munich.	Website: https://productronica.com/en

Dixon Technologies to double revenue amid India's electronics boom

Dixon Technologies India, the assembler of Google's Pixel smartphones, is poised to more than double its revenue this fiscal year, said Director Atul Lall. In the previous fiscal year ending March 2024, Dixon reported a 45% increase in revenue, reaching ₹177.13 billion (\$2.04 billion). The company's expansion aligns with global tech giants like Google and Apple, which are diversifying their supply chains by increasing production in India.

MeitY unveils AIKosha to boost India's AI innovation

India's Ministry of Electronics and Information Technology (MeitY) launched AIKosha, a platform offering datasets, models, and tools to promote AI innovation. Other initiatives include the AI compute

portal, which provides subsidised GPU access and skill development programmes. These efforts aim to strengthen India's global AI leadership and support research, startups, and public sector AI use.

India-Qatar partnership fuels growth in tech and innovation

India and Qatar are deepening ties in cutting-edge technologies like AI, IoT, and semiconductors, focusing on innovation, sustainability, and investment. Officials highlighted a shift from traditional energy trade to tech collaboration at the India-Qatar business forum. With reforms and MoUs, both countries aim to boost digital transformation and future industries.

US engages in car tariff negotiation with India as Tesla eyes expansion

The US urges India to reduce high car import tariffs, which hinder Tesla's entry into India's growing EV market. Despite potential tariff cuts, India remains cautious due to concerns over local manufacturers. Tesla plans to launch in India by April, with show-

rooms in Delhi and Mumbai, eyeing premium EV demand.

Japanese component-maker Murata eyeing production shift to India

Japan's Murata Manufacturing, a key supplier of iPhone components, is considering relocating part of its production capacity to India. The company has reportedly leased a facility in OneHub Chennai Industrial Park in Tamil Nadu, where it plans to package and ship capacitors starting in April 2026. As Murata President Norio Nakajima confirmed, the company is seeing growing demand in India, prompting it to assess the potential for increased investment here.

BEL bags contracts worth ₹41.26 billion from defence ministry

Bharat Electronics Limited (BEL) has secured a ₹29.06 billion contract from the Ministry of Defence (MoD) to supply Ashwini Radars, developed with DRDO. These advanced AESA radars offer enhanced 4D surveillance for the Air Force and can track aerial targets. BEL has also signed a ₹12.2 billion deal to supply 149 advanced software-defined radios for the Indian Coast Guard. These radios will enhance communication, coordination, and situational awareness, boosting maritime security.

MHI signs 10GWh battery agreement with reliance

The Union Ministry of Heavy Industries has partnered with Reliance New Energy under the PLI Scheme for Advanced Chemistry Cells (ACC), granting them a 10GWh manufacturing capacity. This move, part of an ₹181 billion initiative, aims to boost India's battery production for EVs and renewable energy storage and enhance local value addition.

Madhya Pradesh signs MoU with SECI for 200MW solar project

SECI and the Madhya Pradesh government have signed an MoU to
