

develop a 200MW solar project and a 1000MWh battery storage in Dhar, with a ₹25 billion investment. This initiative, part of a 500MW agreement, aims to boost renewable energy in the state and provide electricity for 25 years.

Delhi EV Policy 2.0 targets 95% transition by 2027

Delhi unveils its new EV Policy, which aims for 95% electric vehicle registrations by 2027, replacing CNG autos with EVs. It offers incentives, boosts charging stations, transitions buses to electricity, and creates EV sector jobs. The policy also focuses on skill development and promoting sustainable transport for a cleaner city.

Bengaluru power electronics startup Dynolt Technologies lands \$1.7 million

Dynolt Technologies, an Indian power electronics start-up founded in 2022, raised \$1.7 million in seed funding led by Transition VC. Yashowardhan Shah, an angel investor, participated. Dynolt focuses on e-mobility, energy storage, and renewable energy. The funding will help expand its EV sector footprint and advance clean energy solutions.

Rishabh Instruments launches new R&D centre at IIT Bombay

Specialising in electrical automation and metering, Rishabh Instruments has partnered with IIT Bombay's ASPIRE Research Park to drive innovation through student-led projects and co-development. The collaboration includes setting up an R&D Centre on campus and gaining access to research facilities and talent to enhance its global technological offerings.

STPI launches advanced incubation hub in Kolkata

The Software Technology Parks of India (STPI) inaugurated a new advanced incubation facility in Salt Lake, Kolkata, to boost innovation and IT exports. The facility, which covers 200,000 sq. ft. (18,580 square metres), offers office spaces, high-speed communication, and mentorship services for startups in emerging tech sectors like AI, IoT, and FinTech, driving regional economic growth.

DoT and ITU forge partnership for AI-driven urban development tech

The Department of Telecommunications (DoT) has partnered with the International Telecommunication Union (ITU) to advance AI-driven digital twin technologies for urban planning. This collaboration focuses on sharing knowledge, developing global standards, and creating AI solutions for smart cities, emphasising data integration, citizen involvement, and privacy.
