

EMBEDDED

Starter kit

The ADIY Uno R3 beginner's kit is a comprehensive, beginner-friendly bundle for exploring Arduino and electronics; no prior experience required. Powered by the ADIY Uno DIP R3 (CH340C), it includes 18 essential components: IR, sound, gas, and soil moisture sensors, a relay, LEDs, resistors, a breadboard, wires, a USB cable, and even a water pump. With in-house manufacturing quality and all parts in one box, it simplifies hands-on learning. *ADIY*

8.9cm SBCs

ADLINK's new SBC35-MTL and SBC35-ASL 8.9cm SBCs bring scalable edge performance. Designed for AMRs, EV chargers, and factory automation, they support wide temp ranges, fanless design, rich legacy I/O, and high-speed connectivity. With modular I/O expansion via SBC-FM, these rugged platforms fast-track AI vision, robotics, and industrial edge deployments. *ADLINK Technology Inc.*

SoM with quad-core processor

Virtium Embedded Artists unveils the iMX8M Mini DX-M1, a compact SoM packed with a quad-core i.MX 8M Mini processor and a powerful 25 TOPS DEEPX DX-M1 AI accelerator. With 4GB LPDDR5 memory for AI tasks and a low power consumption of 5W, it simplifies the design of edge AI

systems. Built-in video, graphics, and Ethernet features make it suitable for drones, surveillance, medical devices, and industrial applications.

SoM powered by 50 TOPS chip

SiMa.ai, in collaboration with Enclustra, has launched a compact SoM powered by the 50 TOPS Modalix MLSoC chip, designed for fast, low-power Gen AI and multimodal applications at the edge. The company claims that the solution reduces the cost

of using AI in small spaces and supports uses such as robotics, automation, and unmanned aerial systems. *SiMa.ai*

IoT relay board

Bug in Circuit by Anu Electronics is an ESP32-based IoT relay board that flips the script on traditional kits. This hands-on twist sharpens real-world skills: fault tracing, datasheet decoding, and logical analysis.

It's more than IoT-ready hardware; it is an immersive lesson in embedded systems, building engineering grit and practical problem-solving mindsets. *Anu Electronics*

Power modules

GAIA Converter has launched rugged, fully integrated power solutions for aerospace, defence, and naval applications. These compact modules combine power conversion, EMI filtering, and protection, meeting MIL-STD

and DO-160 standards. With broad input support, isolated outputs, and

fanless designs, they simplify architecture, ensure resilience, and accelerate deployment in mission-critical environments.

ATX motherboard

IBASE's new MBB1005 ATX motherboard, powered by Intel Core Ultra 200S, delivers edge AI, automation, and industrial computing muscle. Built-in TPM 2.0, watchdog timer, and iSMART 4.0 provide mission-critical reliability, empowering OEMs to build scalable, rugged, and intelligent platforms for tomorrow's smart factories.

MANUFACTURING EQUIPMENT & MATERIALS

ESD protective paint

ProShield ESD 1PP1 by SCH Solutions is a breakthrough conductive paint for polypropylene and copolymer surfaces, providing permanent ESD protection without the use of carbon or metal fillers. Its 100% polymer matrix ensures consistent resistivity with no hotspots or cracking. Whether applied as a single-part or reinforced two-part system, it adheres to multiple surfaces.
