

AI4AOI

AI-Native. Future-proof by design.

Welcome to a new AOI & SPI world.

Delvitech systems are engineered with AI at their core—purpose—built neural networks developed to meet the real-world challenges of electronics manufacturing. Unlike traditional solutions, our machines dynamically adapt to production variations, detecting defects with unmatched precision, even on complex materials like transparent glues or metallic surfaces.

One scalable platform, one brain—ready for both AOI and SPI.

Swiss by design, global by vision: with a production site and commercial hub in India, we ensure proximity to key markets and operational agility.

**It's not just innovation.
It's a new species of machine.**

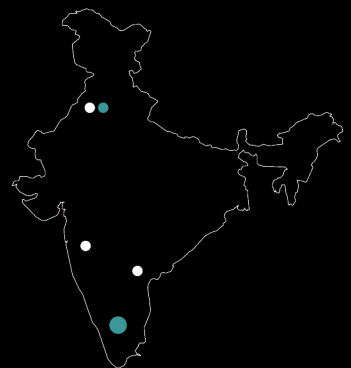

**DELVI
TECH**

Swiss Precision Thinking.
Powered by AI.
Perfected by Design.
