

Robotic Soldering and Automation

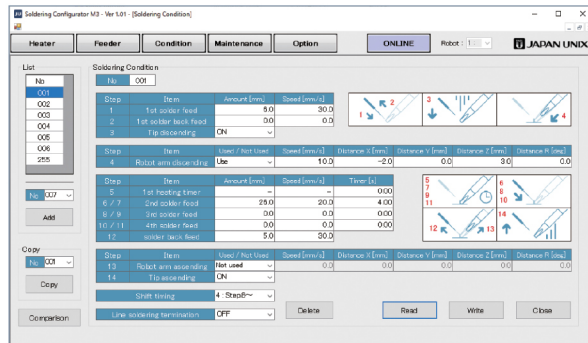

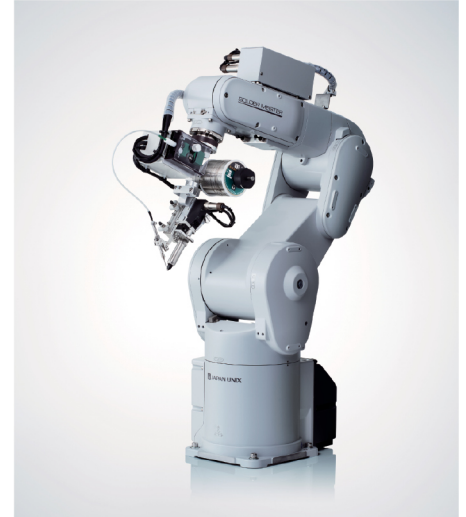

UNIX-FR Series

Multiple-joint Soldering Robot

New Generation of Vertical Multiple-Joint Soldering Robot for the Era of Full Automation

Enhanced communication network function for output and storage of soldering-related data, and comprehensive software that can be used regardless of operator skill.

Of course, it is also compatible with SolderingManager for enhanced traceability. The new robot is designed to be more manpower-saving and easier to use.

Speedy setting and adjustment of mass produced motions

Comprehensive and user-friendly software that can be used regardless of operator skills

- Soldering conditions can be easily programmed using the PC-specific software "Soldering Configurator".
- Soldering-specific commands are used to make robot instruction easier to understand.
