

THE DASHBOARD

India's Electronics Exports Soar 47% YoY In April-May 2025

India's electronics exports rose to \$8.26 billion in April-May FY25-26, a 47% increase from \$5.61 billion a year earlier. Smartphone exports were key drivers, crossing \$21 billion in the first 11 months of FY24-25, exceeding the \$20 billion target. The growth reflects strong policies, industry collaboration, and India's rising role in the global electronics supply chain.

India's PC Market Grows 13% YoY In 1Q25, Tablets Stumble

In Q1 2025, India saw PC shipments rise 13% YoY to 3.3 million units, led by a 21% rise in notebooks and a 253% surge in AI-capable models. Driven by enterprise refresh cycles and the phase-out of Windows 10, the market is projected to grow 6% in 2025, surpassing 15 million units. However, tablet shipments declined 24% YoY to 1 million, with commercial tablet sales dropping 54%. Recovery is expected in 2026, particularly in the education sector.
