and Omega Semiconductor. Supported by ₹165.35 billion, the plant produces 3000 IPMs daily and is expected to scale to 6.3 million per day. Kaynes will supply 10 million chips annually to AOS for a period of 5 years, as outlined in the contract.

New PLI round attracts ₹19.14 billion white goods investment

The fourth PLI round for white goods drew 13 applications with ₹19.14 billion in proposed investments, mostly from MSMEs. Nine firms plan to invest ₹18.16 billion in AC components, while four seek ₹980 million for LED parts. Spread across six states, the proposals boost localisation, jobs, and manufacturing under a scheme that has now attracted a total of ₹103.35 billion.

China resumes rare earth exports, offering relief to Indian manufacturers

China has reopened its rare earth exports, which is a significant relief for Indian manufacturers dependent on critical minerals. The decision follows a year-long trade truce between the US and China, which has eased global supply pressures on industries such as electronics, automotive, and renewable energy. Industry experts noted that the development would likely benefit Indian firms, particularly those engaged in EV manufacturing, defence production, and high-end electronics.

DigiKey inaugurates its Bengaluru GCC and expands global footprint

DigiKey has officially launched its Indian subsidiary, DigiKey Electronics & Automation Trading Private Limited, in Bengaluru. The new global capability centre will support the company's international operations and form part of its broader global expansion strategy. According to the company, the Bengaluru centre will employ around 300 professionals, who will work alongside DigiKey's 4700 employees worldwide.

Maharashtra partners with Starlink to expand satellite internet access in remote regions

Maharashtra becomes the first Indian state to formalise an agreement with Starlink Satellite Communications Pvt

DIY KIT: Agriculture IoT & AI

Want to create exciting IoT projects for agriculture use cases or agri-IoT projects?

This kit provides everything you need to create typical IoT for agriculture (aka agri IoT) projects.

KIT INCLUDES:

- Soil Sensor
- GSM Module
- Relay Module
- IndusBoard Coin

POWERED BY

IndusBoard
COIN

Super small sized development board that enables you to create solutions for many use-cases where small size is super important.

SPECIAL INTRO PRICE

₹2,149 (Inclusive of GST)
