Of this, 10,000MW were deployed within India and 5000MW exported, roughly equal to 28 million modules covering around 7500 football fields. Approximately

Representational image

70% of these were made using India-manufactured solar cells, underscoring the company's alignment with the country's goal of self-reliance.

Tsuyo Manufacturing raises ₹400 million to boost EV powertrain innovation

Tsuyo Manufacturing has raised ₹400 million in a Pre-Series A round led by Avaana Capital to expand its electric vehicle powertrain innovation. The company will set up a second research and development centre and a new greenfield plant. The upcoming facility will be its third unit, producing electric motors upto 250 kilowatts and transmission assemblies.

ISRO to launch BlueBird 6 satellite into low-earth orbit

ISRO is preparing to launch AST SpaceMobile's 6.5-tonne BlueBird-6, one of the heaviest commercial satellites, aboard its LVM3 rocket from Sriharikota. The satellite has already arrived in India, and the mission is expected to take place in December 2025. Managed by NSIL, the launch strengthens India's growing role in global heavy-lift commercial missions.

TEC and IIT Hyderabad join hands for 6G leadership

The Telecommunication Engineering Centre (TEC) has partnered with the Indian Institute of Technology (IIT) Hyderabad to boost India's role in future telecom development and global standardisation. The agreement aims to advance work on emerging fields, including 6G networks, artificial intelligence in telecom systems, and non-terrestrial connectivity.

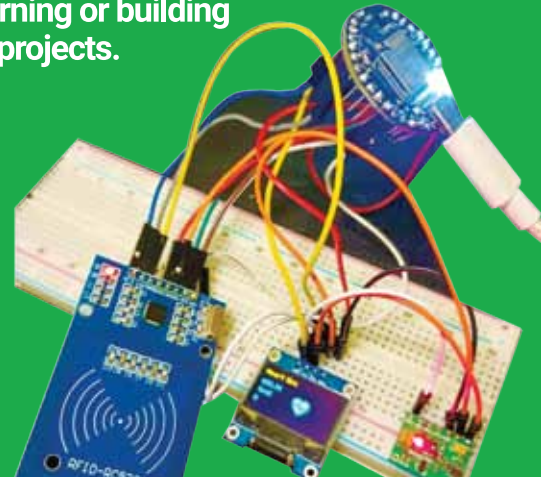

Microchip Technology expands India presence with new Bengaluru office

Microchip Technology has expanded its India footprint by acquiring a 1.72 lakh square foot (15,979.32 square metres) office space at the EPIP Zone in Whitefield, Bengaluru. The new facility reinforces its long-term focus on engineering, design, and R&D. Serving as an extension of the Bengaluru Development Centre, it can house more than 3000 employees and will support future hiring and global collaboration.

DIY KIT: NFC, RFID, IoT & Embedded Systems

Want to learn and master NFC and RFID technology along with an IoT-enabled embedded system?

This kit includes all the essentials to start learning or building RFID/NFC projects.

POWERED BY

IndusBoard
COIN

Super small sized development board that enables you to create solutions for many use-cases where small size is super important.

SPECIAL INTRO PRICE

₹1,999 (Inclusive of GST)
