

BUSINESS: PURCHASE

**ASMP T
Material
Tower**

ADDVERB TECHNOLOGIES LIMITED

Website: addverb.com
Address: Plot No. 5, Sector-156, Phase-II,
Noida, 201301, Uttar Pradesh, India
Email: automate@addverb.com
Contact: 9871590101
Brands Supplied: ADDVERB

ASMP T INDIA PRIVATE LIMITED

Website: smt.asmpt.com
Address: 1606, Spaces 16th & 17th Floor
Max Towers, Sector 16B, Noida, Uttar
Pradesh 201301

Global OEMs In India

ORGANISATION	WEBSITE
ASMP T INDIA PRIVATE LIMITED	smt.asmpt.com
JUKI INDIA PRIVATE LIMITED	smtjukiindia.com
SEAMARK SMT EQUIPMENT PVT LTD (ROCINATE TECHNOLOGIES)	www.seamarkzm.in
KARDEX INDIA STORAGE SOLUTIONS PRIVATE LTD	info.kardex.com
INOVA XE INDIA PRIVATE LIMITED	www.inovaxe.in

Email: neeraj.bhardwaj@asmpt.com
Contact: 0120 7185376

Brands Supplied: ASMP T

AXIS AUTOMATION

Website: www.axisautomation.in
Address: 857, Anagha Building, ACES
Layout, 1st Main, B Block, Singasandra,
Bengaluru, Karnataka - 560068
Email: sales@axisautomation.in
Contact: 080 49529793
Brands Supplied: MYCRONIC

BERGEN ASSOCIATES PVT LTD

Website: bergengroupindia.com
Address: 305-306, Magnum House-1,

Commercial Complex, Karampura,
Delhi - 110015

Email: info@bergengroupindia.com
Contact: 011-41425362/0124-6925600
Brands Supplied: MYCRONIC

Any Indian OEM?

Yes, Indian company Addverb Technologies
has introduced Vertex - Smart Storage And
Retrieval For SMT Industry.

How Automated SMT Storage Is Better Than Traditional Storage

Traditional storage (e.g., manual shelves, cabinets) relies on human intervention for inventory management, leading to errors, downtime, and inefficiency. Automated SMT solutions address these through technology, as summarised below.

ASPECT	TRADITIONAL STORAGE	AUTOMATED SMT STORAGE	IMPROVEMENT/IMPACT
Inventory Accuracy	Manual tracking; prone to miscounts and up to 20% discrepancies	RFID/IoT real-time tracking with automated validation; up to 99% accuracy	50-80% fewer errors, prevents missing or wrong components
Retrieval Speed	5-10 min per batch; dependent on operator knowledge	Automated retrieval in 1-2 min, consistent across operators	60-70% faster access, reducing SMT downtime by 25-40%
Space Efficiency	Conventional shelves occupy 5-10m ² per 1000 reels	Vertical storage fits 1500-2000 reels in 1-2m ²	80-90% space savings, ideal for Indian EMS environments
Labor Dependency	High reliance on operator sorting, labeling, and record updates	Minimal intervention; automated indexing and guided workflows	25-50% labor reduction and supports lights-out automation
FIFO/FEFO Compliance	Not guaranteed; dependent on discipline and tracking accuracy	Fully automated FIFO/FEFO enforcement	Prevents expired/aged stock and material loss
Traceability	Manual logs or spreadsheets; error-prone and slow	Full batch/lot/reel traceability with operator and timestamp logs	Enables full traceability for audits and process control
Moisture and Expiry Control	Manual monitoring; high risk of over-exposure, requiring re-bake	Real-time MSD control with tracking of floor life, humidity, and exposure	Reduces re-baking and component degradation risk
Line Kitting and Return Management	Manual, slow, and prone to misplacements	Fully automated line kitting and return validation process	Faster changeovers and error-proof material flow
Reel Counting and Reconciliation	Separate process; manual or periodic reconciliation	Integration with X-ray counters for automatic reel reconciliation	Improved inventory forecasting and consumption accuracy
Error Prevention	Operator-driven; mix-ups and mislabeled reels are common	Controlled, operator-proof guided retrieval and return workflows	Zero-defect inventory handling
Quality and Audit Compliance	Difficult to document; requires manual record maintenance	Digital compliance supporting IATF, ISO, IPC, ESD requirements	Faster audits and proactive compliance documentation
Integration and Data Visibility	Standalone and disconnected from MES/ERP systems	Real-time integration with MES/ERP and SMT lines for planning	30-50% workflow optimisation and full Industry 4.0 readiness
Lean/JIT Compatibility	Not aligned; prone to clutter and inefficiencies	Built for 5S, Lean, and Just-In-Time (JIT) workflows	Improved material flow discipline and predictable production
Cost Model	Low upfront cost but high long-term waste, labor, and rework cost	Higher investment with ROI achieved in 6-12 months	20-40% lower total cost of ownership over 3 years
Scalability	Limited; increasing storage requires more space and manpower	Modular expansion for high-mix and high-volume production	25-30% faster scaling, future-proof for growth
