

ZILOGIC

Embedded Software Test Automation Tools

Zilogic Systems, a leading embedded engineering company, offers comprehensive services in Design & Development, Integration & Testing, Embedded DevOps, Test Automation, and tools for embedded product development. As part of our cutting-edge test automation solutions, we develop a range of devices critical for embedded software testing. Proudly *Made in India*, these tools are engineered to replace imported alternatives, driving self-reliance and excellence in the embedded systems design industry.

ZS1220: USB PDU

programmable power strip to enable or disable power delivery to connected devices.

ZS1210: USB Relay

Programmable 8 Port relay to simulate/emulate IO state.

ZS1120: USB 3.0 Switch

8 Port Programmable USB Switch, that helps switching between eight device and two host.

ZS1110: USB 2.0 Switch

ZS1320/ZS1330

Automotive Ethernet Converter

Converts the Automotive Ethernet (100/1000 Base-T1) to standard Ethernet.

ZS1310/ZS1311

USB to CAN/CAN FD Adapter

Connect PC to CAN bus systems for simulation, analysis and debugging.
