Power Module

SynQor has introduced the MPFICQor, a military-grade power factor correction module designed for airborne applications, including underwing pods and ordnance systems. With advanced active power factor correction technology, the module boasts an impressive 92% efficiency, minimising heat generation and enhancing thermal management.

Motherboards

ASUS has launched the B850 and B840 AM5 motherboards for AMD processors, featuring models from ROG Strix, TUF Gaming, and Prime families. The upgraded 1920x1080 BIOS interface improves usability, with the Q-Dashboard displaying hardware information. ASUS AI Advisor enhances troubleshooting and performance optimisation, aiding both novice and experienced builders.

MANUFACTURING EQUIPMENT

3D AXI Platform

Test Research, Inc. (TRI) has launched the 3D AXI TR7600FB SII, offering

high-resolution X-ray imaging for electronics manufacturing. Designed for quality control, manufacturing, test, and production engineers, the system inspects and monitors components like BGAs, SiP, and Flip-Chip. The system detects defects in industries like aerospace, automotive, and medical.

TEST & MEASUREMENT

Wi-Fi 7 Connectivity Test Set

Anritsu Corporation has introduced an enhanced option for its MT8862A wireless connectivity test set, designed

to measure the transmit and receive performance of Wi-Fi

7 2 × 2 MIMO devices. Targeted at manufacturers and engineers, Wi-Fi 7 is crucial for applications like AR, VR, and UHD video. The test set streamlines complex MIMO testing, advancing next-gen wireless connectivity solutions.

3D Laser Snapshot Sensor

Keyence Corporation has introduced the LJ-S8000 series 3D laser snapshot

sensor, an auto-scan system featuring a built-in scanner for ultra-high-speed, precise 3D measurements without extra equipment.

Ideal for automotive, electronics, and food packaging industries, its ability to perform inline 100% inspections enhances yield, quality, and operational efficiency, addressing various

inspection needs across sectors.

Ultrasonic Thickness Gauge

KUSAM-MECO's ultrasonic thickness gauge model KM-131D is designed

for quick, accurate thickness measurement in industrial applications. Powered by a microprocessor, it delivers precise measurements and sound speeds for materials like metals, plastics, ceramics, and glass. Ideal for monitoring pipelines, pressure vessels, and corrosion, this device excels in environments that require high precision.

Vector Signal Generators

Rohde & Schwarz has upgraded its vector signal generators, the R&S

SMW200A and R&S SMM100A, enhancing their capabilities

to meet the needs of modern wireless technologies. The R&S SMW200A now features improved EVM performance and higher output power.

Arbitrary Waveform Generator

Siglent Technologies' SDG1000X Plus arbitrary waveform generator series is

a cost-effective solution for engineers in fields like embedded systems, IoT, power supply, industrial control, ATE bench integration, and research. The series features versatile modulation modes, high-speed PRBS
