India's Smartphone Market To Cross \$50 Billion

Fuelled by a growing demand for premium devices, India's smartphone market is expected to surpass \$50 billion in 2025. The average retail price is projected to exceed \$300, with the premium segment (₹30,000+) capturing over 20% of the market share. Leading brands such as Apple, Samsung, and OnePlus are capitalising on this trend by offering cutting-edge features and leveraging local manufacturing.

Growth Of Global Wearable Market To Slow Down This Year

With the end of 2024, the growth of global wearable shipments is expected to slow to 3.9% in 2025. Projections indicate that 2024 ended with sales of 538 million units, reflecting a 6.1% YoY growth. Based on the market's 3Q24 results, smartwatches are anticipated to record a 4.5% decline due to market saturation in India and the US. Hearables will grow by 10.3%, while emerging categories like smart rings and displayless glasses will gain traction, prompting new competitors.
