

India's smartphone exports hit ₹203 billion before the end of 2024

India crossed ₹200 billion in monthly smartphone exports in the penultimate month of 2024, reaching ₹203 billion, driven by Apple. This represents over 90% YoY growth. Smartphone exports are now India's third-largest export commodity, boosted by the PLI scheme and major investments from Apple and Samsung. The sector has also generated significant jobs and contributed ₹2.87 trillion to exports.

India adjusts electronics import figures, reflecting a \$2.7 billion drop

The central government has revised its electronics import data for the first eight months of 2024-25 downward by \$2.7 billion, totalling \$61.2 billion, reflecting a 4.2% decrease. The revision stems from data transmission issues during the shift from NSDL to ICEGATE. These adjustments aim to enhance accuracy in trade statistics and are critical for economic planning and policy formulation.

Government launches ₹140 billion initiative to boost the EV ecosystem

The Indian government, through DST and ANRF, has launched a ₹140 billion initiative to advance the EV ecosystem. Focused on R&D over five years, the programme aims to reduce reliance on imports, especially from China. Key areas include battery technology, power electronics, and charging infrastructure, with an initial emphasis on battery development over the next three years.

IndiaAI Mission advances as government moves to acquire 10,000 GPUs

The government of India is trying to make available 10,000 GPUs of various kinds for the benefit of startups, researchers, academicians, and students in India through a bidding process. The government has allocated over ₹1000 billion (₹10,372 crore) to be spent over five years on the IndiaAI Mission, under which it is trying to procure the GPUs that are currently in short supply. In all, 19 companies had submitted proposals for the GPU tender, of which 10 have been shortlisted for final evaluation by a technical committee set up for the purpose. The GPUs will be procured mostly from Nvidia and AMD, while Intel is also expected to supply some.

India's 2025 laptop import policy eases, with 5% annual reduction

India is set to adopt a more liberal policy for laptop and tablet imports this year, allowing a 5% annual reduction to promote local manufacturing. A mid-year review will adjust import levels, preventing shortages and ensuring a smooth transition. By the second half of 2025, all laptop and tablet brands are expected to begin manufacturing locally, with import approvals required for the year.

An "AWESOME" Development Board from India?

- **Super Small:** 3 centimeters
- **Super Smart:** 3 processors
(Xtensa® Microprocessor + 2 ULP RISC-V Coprocessor)
- **Super Sensitive:** 5 Sensors
- **Super Connected:** Wifi & 10+ Interfaces
- **Super Flexible:** 30 GPIOs
- **Super Easy:** FPC + Dedicated Battery Connector
