to generate the QR code. Save and download the QR code.

For production deployment, print the QR code on the user manual and packaging for the end user. The device can then be provisioned easily by scanning the QR code. Fig. 5 shows the device QR code generated for provisioning.

Download the RainMaker app from the App Store or Play Store and sign in using an email account or iCloud account. In the app, select the plus icon at the top. The app will prompt you to scan a QR code. Scan the previously saved QR code.

After the app connects to the device's Wi-Fi network, select the home Wi-Fi network and enter the password. The app will handle configuration, send Wi-Fi credentials, connect the device, and add it to the RainMaker platform. A notification confirms successful addition. Fig. 6 shows the app provisioning the device.
