

INDIA'S INNOVATORS IN Automotive And EV Ecosystems

How can we foster innovation in electronics? Would awards for R&D and NPD teams be a good starting point? And which sectors should we focus on?

EFY's Auto R&D Awards aim to answer these questions. While there are numerous awards recognising CXOs, there is a lack of recognition for R&D and New Product Development teams, those who hold the power to transform India from a 'consumer' to a 'creator' nation. With this in mind, we launched these awards to honour innovation in the automotive and EV ecosystems. The inaugural edition was held alongside MOVES 2026, a conference dedicated to R&D and innovation in these sectors, co-located with EFY Expo Pune 2026. Below are glimpses of the winners and the award ceremony...

The Winners

Dash Dynamic Private Limited

Robin Singh and Shashank Sawai from Dash Dynamic receiving the award for developing 'Wireless Charging Solutions for EVs and Drones,' presented by Pramod Chaudhary from Varroc.

Electrical Research and Development Association (ERDA)

Asheesh Dhaneria from ERDA receiving the award for their 'Bharat Charges: An indigenous DC fast charger for EVs,' from Varroc's Pramod Chaudhary.

Ergen Technovation Pvt Ltd

Sahil Nahar and Nityanand Prabhutendolkar from Ergen Technovation collecting their award for creating 'OptiGAN: Advanced GaN tech solutions,' from Varroc's Pramod Chaudhary.

Ken Integrated Technologies

Shankar Kumbhar from Ken Integrated Technologies receiving the award for their 'Automated Airbag Testing and Validation System,' presented by Varroc's Pramod Chaudhary.
