

At-a-glance view of key industry trends that can shape the future of your business...

Global Semiconductor Sales Hit Record \$75.3 Billion In November 2025

Semiconductor sales worldwide reached a record \$75.3 billion in November 2025, up 29.8% year-on-year and 3.5% month-on-month, according to the Semiconductor Industry Association. Demand rose across all major product categories. Asia Pacific led annual growth at 66.1%, followed by the Americas, China, and Europe, while Japan declined. The global chip market is projected to approach \$1 trillion in 2026.

Global Smartphone Shipments Rose 2% In 2025

Global smartphone shipments grew 2% YoY in 2025, marking a second consecutive year of growth, driven by premiumisation, financing options, and rising 5G adoption in emerging markets. Apple led with a 20% market share, followed by Samsung (19%), Xiaomi (13%), vivo, and OPPO. Growth varied regionally, with mature markets lagging. The market is expected to soften in 2026 due to component shortages and rising costs.

Global PC Shipments Grew 10% In Q4 2025

Global PC shipments, including desktops, notebooks, and workstations, rose 10.1% in Q4 2025 to 75 million units, bringing full-year 2025 totals to 279.5 million, a 9.2% increase over 2024. Notebook shipments grew 8%, desktops 14.4%. Lenovo led with 25.8% market share, followed by HP (20.6%), Dell (16.7%), Apple (9.4%), and Asus (7.1%). Supply constraints in memory and storage drove price increases, and 2026 growth will depend on vendors' supply management and high-end SKU focus.

China Drove 31% Share Of Smartwatch Shipments Globally In 2025

Global smartwatch shipments rebounded in Q3 2025, putting the market on track for an expected 7% YoY growth. Apple posted a 12% shipment increase in the quarter, raising its market share to 23%. Huawei drove the strongest momentum, growing 42% YoY to an 18% share, while Xiaomi rose 22% to 9% and Imoo grew 17% to 7%. China remained the key growth engine, lifting overall market performance. Its market share soared from 25% in 2024 to about 31% in 2025.
