

# Key Advancement In Reflow Ovens

| TECHNOLOGY/FEATURE                      | WHAT IT IS/HOW IT WORKS                                                                                                                     | KEY BENEFITS FOR EMS INDUSTRY                                                                                                                                                                                                    |
|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Multi-Zone Thermal Control              | Independent heating/cooling zones (>6-8+) to shape thermal profiles for preheat, soak, reflow, and cooling stages                           | Tighter temperature uniformity→higher yield and reliability, especially for lead-free and high-density boards                                                                                                                    |
| Advanced Temperature Profiling          | Enhanced control algorithms and sensors that maintain temperature accuracy across zones                                                     | Lower defects, consistent solder joint quality, better handling of different paste alloys                                                                                                                                        |
| Real-Time Monitoring and Feedback       | Continuous tracking of thermal parameters with alarms and automated process adjustments                                                     | Detects process drift early→reduces rework and improves SPC (statistical process control)                                                                                                                                        |
| IoT and Digital Connectivity            | Integration with MES/ERP, cloud dashboards, remote monitoring, and data logging                                                             | Greater traceability, remote troubleshooting, supports Industry 4.0 smart factories                                                                                                                                              |
| Predictive Maintenance and AI           | ML models analyse historical process data to forecast maintenance needs                                                                     | Reduces unexpected downtime and extends equipment life                                                                                                                                                                           |
| Nitrogen and Vacuum Atmospheres         | Controlled gas chambers (nitrogen or vacuum) to reduce oxidation and voids                                                                  | Better solder joint reliability—especially for automotive/medical electronics                                                                                                                                                    |
| Energy Efficiency and Heat Recovery     | Systems that reuse waste heat and optimise heating to reduce power consumption                                                              | Lower energy costs and environmental impact                                                                                                                                                                                      |
| Compact and Modular Configurations      | Benchtop and modular ovens scalable to production needs                                                                                     | Flexibility for small batches and SME/low-volume EMS environments                                                                                                                                                                |
| Automation and Conveyor Enhancements    | Improved conveyors with tighter control and integration with material handling systems                                                      | Higher throughput, reduced board stress, smoother line flow                                                                                                                                                                      |
| User-Friendly HMI and Recipe Management | Advanced touchscreens, recipe libraries, and guided setups                                                                                  | Shorter setup times, fewer operator errors, faster changeovers                                                                                                                                                                   |
| Flux Management                         | Trap the flux residues inside the reflow by an advanced mechanism                                                                           | Cleaner PCBA, more machine availability for production due to less cleaning of the Oven                                                                                                                                          |
| Forced Cooling Through Chilled Water    | Flow of chilled water in the heat exchangers in the cooling zones cools down the Nitrogen through convection and hence the PCBA temperature | Forced cooling in the first cooling zone is most important to control the duration of TAL. Cooling in subsequent cooling zones helps in reducing PCBA temperature. Lower PCBA temperature reduces false calls in post-reflow AOI |

## INDOE ENTERPRISES

Website: [indoeenterprises.com](http://indoeenterprises.com)  
Address: G-232, G Block, Sector 63, Noida, Chotpur, Uttar Pradesh 201301  
Email: [sales@indoeenterprises.com](mailto:sales@indoeenterprises.com)  
Contact: 8299544092

**Benchtop Reflow Oven Brand(s)**  
**Supplied:** Puhui

## JVA SMT TRADERS

Website: [www.jvasmttraders.com](http://www.jvasmttraders.com)  
Address: Shop No. F- 15, Greater Faridabad, V.P.O.- Kheri Kalan, Faridabad - 121002, Haryana  
Email: [jvasmttraders@gmail.com](mailto:jvasmttraders@gmail.com)  
Contact: 7971190246

**Inline Reflow Oven Brand(s) Supplied:**  
Zhengbang

**Benchtop Reflow Oven Brand(s)**  
**Supplied:** Puhui, Zhengbang

## KAMPFER AUTOMATION PVT LTD

Website: [www.kampferindia.com](http://www.kampferindia.com)  
Address: 119,E-20, BDA, Domlur 2nd Stage, Bengaluru, Karnataka - 560071  
Email: [sales@kampferindia.com](mailto:sales@kampferindia.com)  
Contact: 080 25351440

**Inline Reflow Oven Brand(s) Supplied:**  
Rehm

## KURTZ Ersa INDIA - SMART PRODUCTION TECHNOLOGIES PVT LTD

Website: [kurtzrsa.com](http://kurtzrsa.com)  
Address: Plot No. 16A, Bommasandra Industrial Area, Bommasandra Attibele Hobli, Anekal Taluk, Bengaluru KA 560099 India  
Email: [sameer.verma@kurtzrsa.com](mailto:sameer.verma@kurtzrsa.com)  
Contact: 9891391919

**Inline Reflow Oven Brand(s) Supplied:**  
Kurtz Ersa

## KYORITSU ELECTRIC INDIA PVT LTD

Website: [www.kyoritsuelectric.com](http://www.kyoritsuelectric.com)  
Address: Plot No.10(P), Survey No.234, 235 & 245, India Land Global Industrial Park, Rajiv Gandhi Infotech Park, Phase 1, Hinjewadi, Pune, Maharashtra - 411057  
Email: [sales@kyoritsuelectric.com](mailto:sales@kyoritsuelectric.com)  
Contact: 9552597468

**Inline Reflow Oven Brand(s) Supplied:**  
Kait

## MAXIM SMT TECHNOLOGIES PVT LTD

Website: [www.maximsmt.com](http://www.maximsmt.com)  
Address: #78 A, Sector-5, IMT Manesar, Gurugram, Haryana -122050

Email: [sales@maximsmt.com](mailto:sales@maximsmt.com)

Contact: 9540870431

**Inline Reflow Oven Brand(s) Supplied:**  
Vitronics Soltec - ITW EAE

## MECTRONICS MARKETING SERVICES

Website: [www.mectronics.in](http://www.mectronics.in)  
Address: 313, 2nd Floor, Patparganj Industrial Area, Functional Industrial Estate, New Delhi, Delhi - 110092  
Email: [mectronics@mectronics.in](mailto:mectronics@mectronics.in)  
Contact: 011-43041581

**Inline Reflow Oven Brand(s) Supplied:**  
HB Technology, EPS Worldwide  
**Benchtop Reflow Oven Brand(s) Supplied:**  
Zhengbang

## MR TECHNOLOGY

Website: [mrtechnology.in](http://mrtechnology.in)  
Address: Unit No.212 & 203, Master Mind I, Royal Palms, Aarey Colony, Goregaon East, Mumbai - 400065  
Email: [sales@mrtechnology.in](mailto:sales@mrtechnology.in)  
Contact: 9702221244

**Inline Reflow Oven Brand(s) Supplied:**  
Jaguar , Qihe

## N.D. TECHNOLOGIES PVT LTD

Website: [www.ndsmtsolutions.com](http://www.ndsmtsolutions.com)  
Address: MCF 123, Gali No. 4, Raja Nahar Singh Colony, Sector 3, Ballabhgarh,
