

Aver Electrotech

is one of the leading Authorised Distributor
for various Industrial Components and Products:

AC-DC

DC-DC

SMPS

Trans Receiver
Modules

IGBT Drivers

Isolator

Customised
SMPS / Electronics
Products

EV Connectors

Electrolytic
Capacitor (Snap In
& Screw Type)

AC Socket

Can the Diotec DB50-16 Revolutionize Your Power System?

DB50-16
Three Phase Bridge Rectifier
in DB Package
50 A | 1600 V
For Demanding Power
Applications

The Diotec DB50-16 is a high-performance three-phase bridge rectifier designed for demanding power applications

With a voltage rating of up to 1600V and a current capacity of 50A, it offers reliable and efficient conversion of AC to DC power. Its compact, robust design makes it ideal for industrial power supplies, motor drives, and renewable energy systems.

The DB50-16 features excellent thermal performance, ensuring durability even in high-stress environments. Easy to integrate into existing systems, this rectifier provides a dependable solution for managing high-power requirements with efficiency and reliability.

Reduce assembly errors by 30% with expert engineering

Get Scalable solutions for your PCB manufacturing with

- ▶ Advanced soldering techniques to reduce assembly errors by 30%
- ▶ Achieve 99.99% Quality Assurance for your PCB Assemblies
- ▶ Cut overall manufacturing costs by 20% with turnkey solutions
