

I am a veterinary doctor. Who brought this 'robot dog' here?

What an effortless flying, bro! We just need to understand its control mechanism!

Working for humans was one thing; but now to this piece of metal?

Our tree climbing machine is stuck here. We should have thought of how to get it down as well!

I brought this dog for my protection, but it prefers to keep a robot dog for its own protection!

Son, we feel you should consult an astrologer before you start your Deep Learning project.
