

Electronics drive India's half-year exports to \$252 bn

India's electronics exports rose 23.7% to \$19.07 billion, contributing to a total merchandise export value of \$252.28 billion from April to October 2024. This growth, driven by increased demand for electronic goods, alongside gains in engineering and pharmaceuticals, marked a year-on-year rise from \$244.51 billion in the same period last year.

UK and Germany show interest in semiconductor manufacturing investments in MP

Madhya Pradesh CM Mohan Yadav said that the state has secured ₹780 billion in various tech investment proposals during his Europe visit, mainly from the UK and Germany. Among other sectors, the semiconductor manufacturing investments include ₹250 billion from the UK's SRAM and MRAM group and ₹140 billion from Germany's Long House Partners.

MeitY seeks ₹400 billion package to boost electronics components production

The Ministry of Electronics and Information Technology (MeitY) is seeking Cabinet approval for a ₹400 billion financial package to boost India's electronics component production. The initiative aims to increase local value addition, create jobs, and strengthen the global supply chain. Focused on components like PCBs and lithium-ion cells, it could attract ₹820 billion in investments.

Uttar Pradesh approves ₹85 billion incentive for semiconductor projects

Uttar Pradesh has approved ₹85 billion in incentives for semiconductor assembly projects by Tarq Semiconductors and Vama Sundari Investments in Noida worth ₹321.46 billion. Focusing on components like silicon photonic devices and DDICs, these projects aim to create 14,780 jobs. An added advantage includes the strategic proximity of these projects near the Noida International Airport.

Andhra Pradesh introduces 80% subsidy for semiconductor investments

The Andhra Pradesh government has a new chip agenda. Their 'Semiconductor & Display Fab Policy 2024-29' aims to attract investments in the field, offering an 80% subsidy (50% from the Central government and 30% from the state) to approved projects. The policy focuses on fostering a self-sustaining ecosystem, encouraging R&D, and boosting infrastructure for semiconductor manufacturing.

ELCINA calls for ₹725 billion in support for India's electronics industry

ELCINA has requested ₹725 billion (US\$8.57 billion) from the government to enhance local electronics production and reduce imports. The proposal includes

An "AWESOME" Development Board from India?

- **Super Small:** 3 centimeters
- **Super Smart:** 3 processors
(Xtensa® Microprocessor + 2 ULP RISC-V Coprocessor)
- **Super Sensitive:** 5 Sensors
- **Super Connected:** Wifi & 10+ Interfaces
- **Super Flexible:** 30 GPIOs
- **Super Easy:** FPC + Dedicated Battery Connector
