JANARDHANA SWAMY AND NEHA J.S.

Yes, ours is a tech government. The minister on my left is an inductor that resists any change, and the one on my right is a resistor that opposes everything.

Stay stiff, walk straight, and look powerful; remember, you now head the energy portfolio!

Hello, I am a new electronics engineer with a PhD in archaeology, and I am hired to help you locate your old design schematics.

That is just the price of the sticker, sir.

Attention passengers, this is your pilot. We will be flying through heavy turbulence, apparently caused by massive cloud storage.

Sir, if debugging is the process of removing bugs, does that mean designing is just adding them?
