upgrade. Backed by the India Semiconductor Mission, the revamp will scale 20.32cm (8-inch) fabrication, add mature-node process platforms, and introduce world-class automation, while retaining full government ownership.

India's new 40nm chip signals a major leap for smart meter technology

India is set to commission its first domestically designed 40nm semiconductor chip for smart meters by June 2026. Led by Cyient with Azimuth AI, the chip will enable real-time power monitoring, cut import dependence, and support India's ₹760 billion semiconductor push. Future applications may extend to IoT and automotive electronics.

New PLI round attracts ₹19.14 billion white goods investment

India's fourth PLI round for white goods received 13 applications totalling ₹19.14 billion in proposed investments, with over half from MSMEs. Nine firms will produce air-conditioner components, while four will produce LED parts. Projects span six states. Overall, the scheme has attracted ₹103.35 billion, with the aim of boosting domestic value addition and job creation.

India unveils ₹7.2 billion quantum fabrication network across top institutes

Union Minister Jitendra Singh announced the launch of 4 quantum fabrication facilities worth ₹7.2 billion under the National Quantum Mission. Located at IIT Bombay, IISc Bangalore, IIT Kanpur, and IIT Delhi, these centres will advance research in quantum sensing, computing, and materials and remain open to researchers from academia, industry, startups, and other sectors.

Microsoft commits US\$17.5 billion for India AI push

Microsoft announced a US\$17.5 billion investment in India from 2026 to 2029 to expand cloud and AI infrastructure, including hyperscale data centres in Hyderabad, Chennai, and Pune. The initiative supports national AI platforms, benefits 310 million informal workers, and doubles the number of people with skills to 20 million, reinforcing India's digital and AI ambitions.

DIY KIT: Agriculture IoT & AI

Want to create exciting IoT projects for agriculture use cases or agri-IoT projects?

This kit provides everything you need to create typical IoT for agriculture (aka agri IoT) projects.

KIT INCLUDES:

- Soil Sensor
- GSM Module
- Relay Module
- IndusBoard Coin

POWERED BY

IndusBoard
COIN

Super small sized development board that enables you to create solutions for many use-cases where small size is super important.

SPECIAL INTRO PRICE

₹2,149 (Inclusive of GST)
