support projects through investment, technology transfer, and operational readiness. Discussions also focused on skill development, logistics, and equipment access. Singapore's Avnet affirmed to expand its India operations.

Japan and India assert semiconductor partnership at G20 meeting

During a bilateral meeting at the G20 Summit, Japanese Prime Minister Takaichi Sanae and PM Narendra Modi reaffirmed cooperation in critical and emerging technologies. They discussed semiconductors, AI, and innovation, strengthening economic and security ties. Both leaders emphasised measurable outcomes, people-to-people exchanges, and collaboration for a free and open Indo-Pacific trade.

TEC and IIIT Delhi partner to drive 6G innovation

The Telecommunication Engineering Centre and Indraprastha Institute of Information Technology (IIIT) Delhi have signed an MoU to advance telecom research. The partnership targets 6G, optical and non-terrestrial networks, AI-driven network optimisation, and enhanced participation in global standardisation. It also covers SDN, NFV, Li-Fi, and energy-efficient telecom systems, supporting indigenous design and secure local solutions.

PM Surya Ghar scheme hits nearly 25% of 10 million target

The PM Surya Ghar Muft Bijli Yojana rooftop solar scheme has installed systems in 2.4 million households, achieving 23.96% of its 10 million target, as of FY 2026. With 5.35 million applications as of December 3, 2025, the scheme accelerates adoption through digitised processes, concessional loans, and simplified regulations. Awareness campaigns, capacity-building, RESCO models, and a multilingual helpline further support nationwide rollout and consumer engagement.

Apple India posts strong FY25 profit growth as revenue climbs

Apple India reported a 16% rise in net profit to ₹31.96 billion in FY25, up from ₹27.4571 billion in FY24. Revenue increased 18% to ₹793.78 billion, driven by strong demand for premium and entry-premium devices. Revenue from operations grew 18.48% to ₹790.6051 billion.

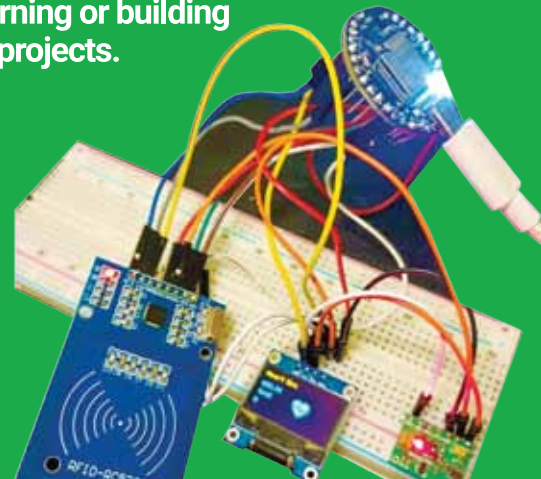

Grahaa Space prepares for its first orbital launch in Brazil

Grahaa Space has secured authorisation from IN-SPACe to launch its first orbital mission, sending the Solaras S2 nano satellite aboard Innospace's Hanbit Nano rocket from Brazil's Alcântara Centre by late November. The mission will validate its satellite bus and subsystems ahead of 2026 launches with Skyroot. The startup plans a real-time Earth observation constellation.

DIY KIT: NFC, RFID, IoT & Embedded Systems

Want to learn and master NFC and RFID technology along with an IoT-enabled embedded system?

This kit includes all the essentials to start learning or building RFID/NFC projects.

POWERED BY

IndusBoard
COIN

Super small sized development board that enables you to create solutions for many use-cases where small size is super important.
