

**RAJGURU ELECTRONICS
(I) PVT. LTD.**

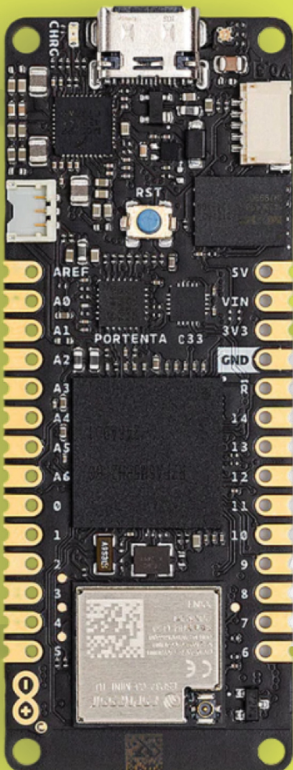

Arduino Nicla Vision

Arduino Nicla Vision is a compact, powerful board with a 2 MP camera, IMU, microphone, and Wi-Fi/Bluetooth, designed for **edge AI tasks** like image processing and object recognition. It's ideal for smart automation and industrial IoT applications.

Arduino Opta WiFi

Arduino Opta WiFi is a compact, industrial-grade **micro PLC** with powerful dual-core processing, secure connectivity (Ethernet, Wi-Fi/BLE), and multiple relays — ideal for edge control, monitoring, and automation in smart buildings and factories.

Arduino Portenta C33

Arduino Portenta C33 is a compact, industrial-grade system-on-module powered by a 200MHz Cortex-M33 MCU with TrustZone®, integrated Wi-Fi/BLE, Ethernet PHY, and a secure element. It offers a reliable, scalable solution for **real-time IoT** secure edge computing, and automation projects, while staying compatible with the Portenta and MKR ecosystems.
