lion group pledge, funds target emerging ventures with strong potential. Chairman Chandrasekaran, focused on profitability by 2027, steps back from Tata Chemicals to prioritise these high-growth units.

VinFast powers into India with \$2 billion investment

Backed by a \$2 billion investment, Vietnam's Vingroup is entering India via its EV arm VinFast, launching VF7 and VF6 models before the festival season. Its first plant is under development in Tamil Nadu. It is also aiming to expand in Telangana and Andhra Pradesh to tap Tier 2-3 markets and cement India as a global expansion hub.

Foxconn commits \$1.5 billion to India as Apple expands iPhone production

Foxconn is investing \$1.5 billion in India via its Singapore unit to expand iPhone production, as Apple accelerates its shift from China amid geopolitical risks. The funds will boost manufacturing capacity and build new facilities in southern India, mainly Tamil Nadu. India produced \$22 billion worth of iPhones last year, with exports hitting \$1.5 trillion (\$17.4 billion).

Eight quantum startups get ₹300 million push

Eight deep-tech startups, including QNu Labs, QPiAI India, QuPrayog, Dimira Technologies, and Prenishq, have each secured up to ₹300 million under Phase 1 of India's ₹60.03 billion National Quantum Mission. Chosen from 100+ applicants, they are building quantum computers, secure communication systems, atomic clocks, and detectors. The grants offer two to three years of equity-free funding. More startups will be funded soon.

Calcom granted PLI 2.0 upgrade, follows ₹250 million investment bet

Calcom Vision has been upgraded under India's PLI scheme for white goods after investing ₹250 million, up 150% from its initial ₹100 million, to expand LED component production. Its Greater Noida facility now includes die-casting and R&D. Calcom targets ₹1.5 billion in added revenue by FY2026-27 and ₹159.6 million in incentives.

Can a Board from India Compete with Arduino Uno & Raspberry Pi RP2040?

"YES, we can!"

- **Super Small:** 3 centimeters
- **Super Smart:** 3 processors (Xtensa® Microprocessor + 2 ULP RISC-V Coprocessor)
- **Super Sensitive:** 5 Sensors
- **Super Connected:** Wifi & 10+ Interfaces
- **Super Flexible:** 30 GPIOs
- **Super Easy:** FPC + Dedicated Battery Connector
