

tors has begun its \$1 billion India expansion by seeking land in Greater Noida for an R&D hub. The facility will support innovation in AI and automotive tech. NXP aims to double its workforce in India and boost its global revenue share, aligning with India's growing semiconductor ecosystem and government-backed tech push.

### UK-India trade deal boosts JLR's EV plans

Jaguar Land Rover (JLR) will benefit from the India-UK free trade agreement, easing the import of fully built battery EVs. While current prices will not drop due to local assembly, reduced import duties on fully built battery electric vehicles (BEVs) could boost competitiveness. JLR eyes growth in India's booming luxury market, with plans to locally assemble the Defender and launch new EVs.

### HorngCom and RRP ink \$12 million semiconductor deal for Mumbai plant

HorngCom Technology, a Taiwan-based AMB subsidiary, has partnered with Maharashtra's RRP Electronics after approving its OSAT facility. The alliance, set to earn \$12 million this fiscal year, boosts India's semiconductor ambitions. RRP will handle key IC services, including SIMs and NAND chips, as both firms aim to drive innovation, efficiency, and global growth in the semiconductor sector.

### Delta Electronics commits to 12-year wind power pact in Tamil Nadu

Delta Electronics India signed a 12-year PPA with Ventus Energy to source 9.6 million units of wind power annually for Tamil Nadu facilities, cutting 7000 metric tonnes of carbon emissions. Sourced via TANGEDCO, the move boosts India's year-2030 clean energy goals. Delta views the deal as key to its long-term sustainability and decarbonisation strategy.

### MIC Electronics secures railway contracts worth over ₹17 million

MIC Electronics won ₹17 million Indian Railways contracts: ₹11.15 million to modernise Pandit Deen Dayal Upadhyaya station with electronic coach indication boards and video walls, plus ₹6 million for emergency lighting units to ensure passenger safety on Vande Bharat trains. Based in Hyderabad, MIC specialises in LED displays and digital transport solutions since 1988.

### Rajasthan enforces battery storage for renewables

Rajasthan has adopted updated Central Green Open Access Rules, mandating battery energy storage systems (BESS) for renewable projects over 5MW, with incentives like up to 100% transmission charge exemption. The policy aims to boost renewables and energy storage in industry, but raises concerns over unclear charges.

# A Unique Dev Board which is perfect for projects which require SMALL SIZE & CONNECTIVITY
