

Key statics of electronics components

**USD35b**

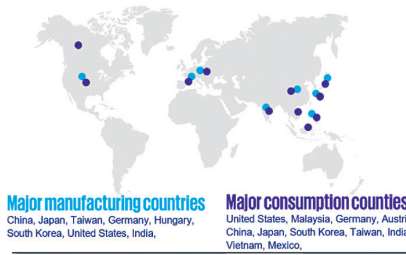

Total exports of electronics from India in FY 2024

**USD89b**

Total imports of electronics in India FY 2024

**USD51.2b**

Total domestic demand of Consumer electronics, mobile phones and industrial electronics in FY24

**Major manufacturing countries**
China, Japan, Taiwan, Germany, Hungary, South Korea, United States, India, Vietnam**Major consumption countries**
United States, Malaysia, Germany, Austria, China, Japan, South Korea, Taiwan, India, Vietnam, Mexico**Electronics market size****USD2,900 b**
Global market size in FY 24**USD169 b**
India market size in FY 24**EMS market size****USD1038 b**
Global market size in FY 24**USD33 b**
India market size in FY 24**>15% CAGR**

Domestic production of electronics goods (FY 2021 - 24)

Consumer electronics, mobile phones, and industrial electronics contribute **~80 per cent** of Indian EMS Market

Common products covered under ECMS and other schemes

Sr. No.	Target segments under ECMS	SPECS	MSIPS	PLI white goods	PLI IT hardware 2.0	PLI large scale manufacturing
A Sub-assemblies						
1	Display module sub-assembly	✓	✗	✗	✓	✗
2	Camera module sub-assembly	✓	✗	✗	✗	✗
B Bare components						
3	Non-Surface Mount Devices (non-SMD) passive components for electronic applications Resistors, capacitors, ferrites, specialty ceramics, inductors, coils (including inductive coil), etc. for electronic applications Electro-mechanicals for electronic applications	✓	✓	✓	✗	✓
4	Speakers and microphones for ICT products, relays, switches, connectors, heat sinks, antenna, vibrator motors, oscillators, filters, actuators, crystals, sensors (non-semiconductor), Transducers, etc. for electronic applications	✓	✓	✓	✗	✓
5	Multi-layer Printed Circuit Board (PCB)	✓	✓	✓	✓	✓
6	Li-Ion Cells for digital applications (excluding storage and mobility)	✗	✗	✗	✗	✗
7	Enclosures for mobile, IT hardware products and related devices	✓	✗	✗	✓	✗
C Selected bare components						
8	High-density interconnect (HDI)/Modified semi-additive process (MSAP)/Flexible PCB	✓	✗	✗	✗	✗
9	SMD passive components Supply chain ecosystem and capital equipment for electronics manufacturing	✓	✓	✓	✗	✓
D Laminate, pre-peg, copper foil, separator, cathode material, anode material, electrolyte, polypropylene film, spray wire, lenses, protective film, glass cover, back light, contrast film, polarizer film, etc. for electronic applications (This is an illustrative list and is not an exhaustive list of supply chain.)						
10	Parts/components used in manufacturing of sub-assembly (A) and bare components (B) and (C)	✗	✗	✓	✗	✓
11	Capital goods used in electronics manufacturing including their sub-assemblies and components	✓	✓	✗	✗	✗

Fig. 2: Key statistics of electronic components and schemes introduced and common products covered under various schemes and ECMS

on the nature of the investment and product segment.

Strategically, the scheme aims to reduce India's import dependence, particularly on China, by strengthening domestic value addition and integrating Indian firms into global value chains. The allocation of incentives operates on a first-come, first-served basis, encouraging early participation.

There is a strong emphasis on quality and innovation, with requirements for design teams and adherence to Six Sigma quality standards; failure to comply may result in exclusion from the scheme. The impact of ECMS extends beyond electronics, supporting the

industrial, power, and automotive sectors. State governments also play a supportive role, with some, like Tamil Nadu, offering matching grants to amplify the central scheme's impact. This collaborative approach between central and state governments, coupled with international partnerships, is expected to further expand the electronics manufacturing ecosystem in India.

What does ECMS cover?

The ECMS is a horizontal scheme, supporting not only consumer electronics but also the automotive, industrial, power, and medical device sectors. It targets:

- **Passive components.** Resistors,

JB MICROSCOPE™
CLEAR VISION
4K DIGITAL INSPECTION SYSTEM
3D VIEW AND AUTOFOCUS (JBM-PL5)

The JBM-PL5, by JB Microscope, is an all-in-one digital microscope featuring 4k resolution, electric controlled continuous zoom, autofocus and providing a large field of view. This system integrates an HDMI/USB camera with an electric controlled (Remote) continuous zoom autofocus objective and 3D view.

JBM-PL 5 equipped with a high-performance SONY CMOS sensor and an embedded ARM core, the camera can be directly connected to an HDMI monitor.

KEY FEATURES

- ✓ 4K FULL HD high speed camera with 1X-10X optics zoom lens.
- ✓ FPS/Resolution: 4K Ultra HD (5 MP 3840x2160), 60@3840*2160 (HDMI) 60@3840*2160(USB)
- ✓ HDMI 1.4 standard 4k/1080P format video output and supporting automatic switch between 4k and 1080P format according to the connected monitors.
- ✓ Imaging, SONY 5M 1/2.8" progressive CMOS, high performance and fast response video.
- ✓ Autofocus, when observing Objects of different heights you do not need to adjust the lens's Working distance.
- ✓ Electric zoom, the magnification can be adjusted through a remote or OTHER I/O device.
- ✓ The Digital 3D Microscope employs advanced stereo imaging technology, providing user with a lifelike, three-dimensional view of specimens.
