

## India reportedly plans \$4 billion incentive scheme for semiconductor, electronics design

India might soon see a \$4 billion Design Linked Incentive scheme to boost its semiconductor and electronics ecosystem. It will target 60% domestic value addition and support 30 product categories, including 5G chips and EV power electronics. This initiative complements the recently launched component manufacturing scheme and increased funding in the 2025 Union Budget.

## Tamil Nadu launches electronics scheme, eyes ₹300 billion investment

Tamil Nadu has launched a new electronics components manufacturing scheme, aiming to attract ₹300 billion in investment and generate 60,000 jobs. Inaugurated by Chief Minister M.K. Stalin, the scheme focuses on key

components like FPCBs, lithium-ion cells, and display modules. It complements the state's broader strategy to become India's electronics hub, with incentives and land allocation to reduce logistics costs.

## PEOPLE (on the move)

### Amitesh Kumar Sinha named CEO of India Semiconductor Mission

Amitesh Kumar Sinha has been appointed CEO of the India Semiconductor Mission (ISM). With expertise in public policy and electronics, Sinha led key initiatives like the Semiconductor Manufacturing Programme and PLI schemes. His leadership aims to boost India's semiconductor sector, supporting the \$500 billion ESDM target by 2030.

### Ajay Dhiman appointed President, COO, and CTO of OPG Mobility

OPG Mobility, formerly Okaya EV, has named Ajay Dhiman as President, COO, and CTO. Dhiman will lead the company's EV business, overseeing operations, R&D, product development, and strategy. With over 20 years in the automotive industry, Dhiman's experience at Revolt Motors, Honda, and Renault-Nissan will drive innovation and execution in OPG's growth phase.

### Ruchir Dixit becomes the Chairperson of IESA for FY2025-26

Ruchir Dixit will serve as the new Chairperson of the India Electronics and Semiconductor Association (IESA) for FY 2025-26. With over 30 years of experience in the semiconductor and EDA industries, Dixit aims to strengthen

India's electronics system design and manufacturing (ESDM) sector. Six industry veterans join IESA's refreshed Executive Council.

### RIR Power Electronics asks Perry Schugart to lead marketing and business

RIR Power Electronics has brought Perry Schugart as its Global Marketing and Business Development Executive to enhance its international presence. With over 20 years of experience, Schugart previously led Microchip

Technology's SiC business, securing \$500 million in orders. His leadership will support RIR's global growth strategy in power semiconductors.
