

INDUSTRY NEWS

75 days. The move boosts Havells' renewable energy presence without entering manufacturing. Goldi's capacity is set to reach 14.7GW by July 2025. The deal aligns with India's solar ambitions and awaits regulatory approvals.

VVDN unveils new electronics manufacturing facility in Manesar

VVDN Technologies has launched its largest SMT line and a new mechanical innovation park at Manesar's Global Innovation Park. Inaugurated by IT Minister Ashwini Vaishnaw, the facility boosts India's electronics design and manufacturing. With advanced PCB capabilities, 6000 AI servers, and 5000+ engineers, it aims to create 3000 jobs and drive hardware innovation domestically.

MeitY picks firms for IndiaAI GPU push

Ministry of Electronics & IT (MeitY) has shortlisted seven firms—Netmagic, Cyfuture, Sify, Vensysco, Locuz, Yotta, and Ishan Infotech—for the next phase of India's ₹100 billion AI Mission GPU procurement. Aiming to secure 15,000 GPUs, the initiative will power AI research and startups. Firms partner with global cloud giants, driving India toward sovereign, large-scale AI compute infrastructure.

NxtCell to manufacture Alcatel smartphones locally with Padget Electronics

NxtCell India has partnered with Padget Electronics to manufacture Alcatel smartphones, marking the brand's return to India after seven years. With an initial investment of ₹2.6 billion, the partnership aims to produce 1.2 million smartphones annually, targeting the mid-premium segment. Alcatel devices will feature stylus support and will be sold exclusively on Flipkart.

Tesla scouts India's chip giants for supply

Tesla is in talks with Micron, CG Semi, and Tata Electronics to diversify its semiconductor supply chain, driven by rising geopolitical tensions. The discussions focus on chip packaging capabilities and ramp-up timelines. With Indian facilities targeting legacy-node chips, Tesla aims to reduce supplier dependency while tapping into India's growing semiconductor sector.

Dixon enters into JV with Taiwan's Inventec to manufacture in India

Dixon Technologies has formed a joint venture with Taiwan's Inventec to manufacture notebooks, PCs, servers, and components in India. Dixon IT Devices Pvt Ltd will be 60% owned by Dixon and 40% by Inventec. The partnership strengthens Dixon's IT hardware presence and supports India's self-reliant manufacturing goals, leveraging local expertise and global technology.
