Smartphones Now India's Second-Biggest Export

'Made-in-India' smartphones have become the second-largest export commodity, with exports reaching \$15.3 billion in April-December 2024, a 46% YoY increase. In FY24, domestic mobile production surged to ₹4.1 trillion, meeting 97% of the demand of US\$36 billion. Besides, India's mobile phone exports grew by 40% in FY24, amounting to US\$15.6 billion, capturing market share from China and Vietnam. However, electronics still make up only 4.7% of total exports. The government aims for \$300 billion in electronics production by 2025-26, with mobile phones contributing 40%.
