

operations, ensuring industry standardisation and scalability, especially for larger vehicles. Industry reactions highlight optimism for EV adoption.

Noida Electronics startup Grid OS raises \$500,000

Grid OS, a Noida-based electronics design and manufacturing startup, raised \$500,000 in funding led by Anupam Mittal and All In Capital. The company, specialising in IoT and smart electronics, plans to expand its product range and improve supply chains. It has also recently secured a ₹1 billion contract with PhonePe and entered the automotive sector with vehicle analytics solutions.

BEL and Safran partner to boost India's defence manufacturing

Bharat Electronics Limited (BEL) and Safran Electronics & Defence have partnered to manufacture, customise, and maintain the HAMMER weapon system locally in India. The collaboration announced at Aero India 2025 aims to reduce dependency on imports and bolster India's defence manufacturing capabilities. A new production facility and R&D centre will be established in Bengaluru.

Delvitech sets up customer experience centre in Bengaluru facility

Delvitech has set up a customer experience centre to allow visitors to engage with Delvitech's AI-driven solutions that optimise inspection and measurement processes. To ensure prompt and reliable service, the company has invested in a comprehensive spare parts inventory so critical components are readily available to minimise downtime and maintain seamless operations.

C-DOT partners with IITs for advanced 6G tech

C-DOT has partnered with the IITs of Bombay and Delhi for advanced telecommunications. IIT Bombay will develop an advanced 6G optical transceiver chipset, enhancing high-bandwidth connectivity for remote areas. At the same time, IIT Delhi is set to make essential terahertz components for 6G communications, military applications, and material analysis. Both projects are part of India's 6G vision under the Telecom Technology Development Fund.

LEGO and C-DAC partner for skill development in India's electronic toy sector

Toy giant LEGO and C-DAC-Noida have partnered to upskill young engineers, especially from underrepresented communities, in India's electronics toy industry, which was highlighted in the Union Budget. The year-long R&D initiative offers hands-on experience at C-DAC-Noida's labs, mentorship from LEGO India, and a visit to LEGO's headquarters in Denmark for insights into toy innovation.

A Unique Dev Board which is perfect for projects which require SMALL SIZE & CONNECTIVITY
