SUN-7), then press '#' (see Fig. 10).

Press '#' to access 'SET HOUR'. Use the keypad to enter the hour (0-24), then press '#' (see Fig. 11).

Press '#' to proceed to 'SET MINUTES'. Enter the minutes (0-60) using the keypad, then press '#' (see Fig. 12).

Once all details are set, the system updates and saves the settings (see Fig. 13).

Setting bell timings

Power on the system. The default day, date, and time will be displayed (see Fig. 14). Press '*' on the keypad to modify the settings. Two options will appear.

Select option 2: Set Bell Timings (see Fig. 15).

Enter the number of bells required (e.g., 3, 7, 10, or more) and confirm by pressing '#' (see Fig. 16).

Set individual bell timings (hour and minutes) one by one (see Fig. 17).

To review the saved bell timings, press 'C' repeatedly to cycle through the stored times.

Once settings are complete, the prototype is ready for use. **EFY**
