HTR's resistors are engineered for the fast-paced world of e-mobility, delivering consistent performance in EV charging stations and battery management systems. Available in a wide range of ratings for 2W, 3W, and 4Wheeler applications—from home setups to

high-capacity commercial stations—HTR ensures efficiency, reliability, and thermal stability. Trusted in 50+ countries, HTR resistors offer precise tolerance and durability, keeping EV systems safe, efficient, and future-ready.

Discover how HTR can accelerate and secure your EV charging solutions.
