

HTR Load Banks: Redefining Power Testing Standards

**BUILT-IN PROTECTION.
PROVEN PERFORMANCE.
GLOBAL TRUST.**

HTR's Load Banks are designed with precision resistor technology at their core—ensuring accurate load simulation and heat dissipation. But the power goes beyond performance. In high-stakes testing environments, our load banks offer **precise load simulation for applications including but not limited to Testing Power Generators, Uninterruptible Power Supply (UPS) Systems, data center stress testing as well as for transformer protection** against unbalancing supply. With global presence in over 50 countries and unmatched engineering, HTR Load Banks are your trusted partners for mission-critical power testing.

Test smarter. Protect better. Power further.

Discover unmatched reliability in power testing.
