

QUIKorrect - Static Servo Stabilizer

Upto 200KVA Technology transfer from MEDI

IGBT based PWM type STATIC VOLTAGE STABILIZER design
Maintenance free, Proven design in the field over 10 years
Manufacture in your own brand name

**BOM of a 20KVA single phase QUIKorrect Stabilizer
with input range $\pm 10\%$ = Rs. 14000/-**

**Technology transfer upto 70KVA single phase &
200KVA three phase = Rs. 11,00,000/-**

Video demo

Highlights of QUIKorrect :

- Single phase, 85V to 300V input range, output 220V $\pm 1\%$ or 230V $\pm 1\%$
- Three phase, 148V to 520V input range, output 381V or 400V or 415V $\pm 1\%$
- Voltage imbalance correction: If input R = 85V, Y = 300V, B = 180V
Output R = 220V, Y = 220V, B = 220V
- Or Input R-Y = 350V, Y-B = 420V, B-R = 234V
Output: R-Y = 400V, Y-B = 400V, B-R = 400V. • No wear and tear like servo stabilizers. • No tap changing like SCR or relay based stabilizers
- 1% tight regulation. • Can handle 10 times surge load.

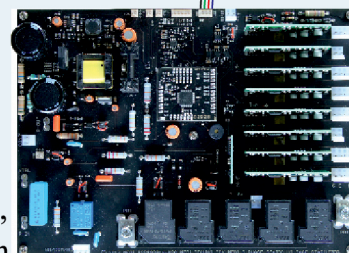

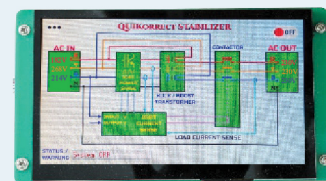

Features:

- Instantaneous correction. Speed over 20000V per second • Discrete IGBT up to 90KVA three phase and IGBT module up to 200KVA three phase
- Protections:- overload, short circuit, low voltage, high voltage etc.
- Can withstand up to 800V continuous input • 6KV lightning protection for 8/20uS • Protection for neutral failure/neutral floating & double phase, no need for isolation transformer. • Uninterrupted bypass during very high surge load > 10 times

Communications:

IOT	Cloud monitoring, control & graphical analysis Data of more than 1 year can be stored (Input V, Output V, Load, Power failure etc with date and time stamp)
WiFi	Android application to monitor and control.
Display	HMI colour touch screen display & Graphical LCD display with remote control options are included to enhance the overall aesthetics and user experience

**HMI
Colour touch display**

**QUIKorrect
200KVA PCB**
