PROTEQ VISO

Experience True Digital 3D Microscopy

No Glasses Required

Meet the **NEW** ProteQ VISO from Vision Engineering - a revolutionary digital stereo microscope set to redefine precision workflows. Its groundbreaking 'autostereo' display delivers true 3D imaging on a flat screen - no eyepieces or glasses required - dramatically enhancing user perception while improving comfort and reducing fatigue.

Engineered for inspection, design and manufacturing, ProteQ VISO combines exceptional 3D imaging performance with powerful digital tools. Users can effortlessly capture and share 3D images, collaborate in real time, and integrate with networks.

Boost productivity and achieve unparalleled clarity for applications in electronics, medical device development, **and more.**

Experience the **next generation of microscopy.**
