

Robotic Soldering and Automation

UNIX-DF Series Desktop Soldering Robot

The new generation desktop soldering robot for Industry 4.0 and IoT.
UNIX-DF Series have improved its network function and robotic motion.

Three types, according to PCB size. These are also applicable and optimized for laser soldering. It can connect with network, which can visualize each soldering process and result.

The additional two axes facilitate penetration angles or rotate PCB, which make difficult soldering component possible from now on.

UNIX-DF204S

UNIX-DF304S

UNIX-DF404S

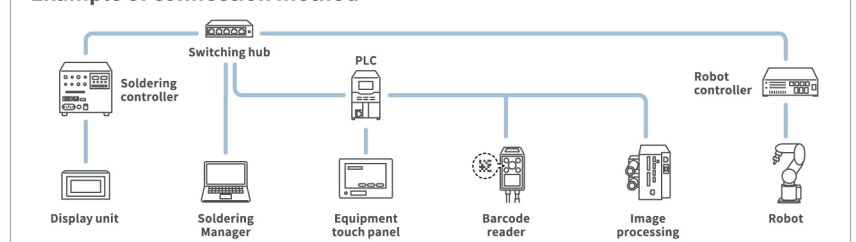

USC-06 Soldering Controller

Data Communication with External Devices via Ethernet Connection
Unlocking Greater Expandability

A next-generation soldering unit enabling visibility into soldering processes through data communication and connection to various robots and equipment.

Example of connection method
