

Rajguru Electronics (I) PVT. LTD.

SMART

Power. Vision. Connectivity.

ADIY ESP32 Development Board (Compatible with UNO)

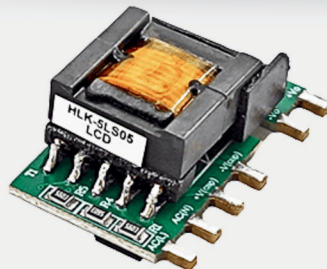

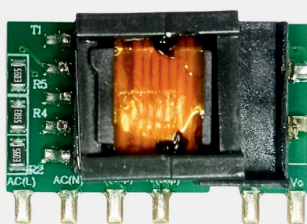

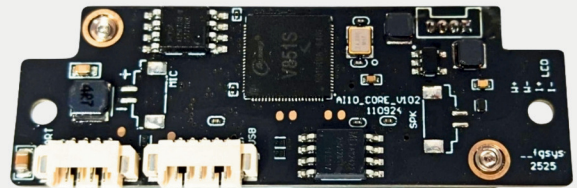

ADIY ESP32 Development Board is a powerful board based on the ESP32-WROVER-32, featuring dual-core processing, Wi-Fi, and Bluetooth 4.2 connectivity.

With 38 GPIO pins, USB Type-C, and flexible module options, it's ideal for IoT, robotics, automation, and wireless communication projects.

HLK AI-10W Face Recognition Module

Powered by an AI chip (ARM 900M + NPU 0.5T), this module delivers ultra-fast, accurate multi-mode recognition.

With built-in 3D liveness detection, dual cameras, visible light face recognition, palm print, palm vein, and QR code recognition, it works in complete darkness and outdoor conditions, supports 1:1 & 1:N modes, local storage for 2000 faces/palm prints.

HLK-5LSXX Series

HLK-5LSXX Series is Compact, high-efficiency power modules with a wide 85–265VAC input range and 3000VAC isolation.

Designed for reliability with low power loss and long lifespan, they're ideal for industrial and embedded applications.
