

Turnkey Liquid Detection Device MTCH9010

Mitigate Risk While Lowering Power Consumption

The MTCH9010 is our first fully integrated, turnkey liquid detection solution. Designed for engineers who demand reliability, simplicity and energy efficiency, the MTCH9010 eliminates the need for complex firmware, analog front ends or continuous MCU involvement. Detection is handled entirely in hardware, ensuring maximum uptime and minimal complexity.

Key Features

- **All-in-One Hardware:** No firmware or analog front-end needed
- **Dual Sensing:** Supports capacitive or conductive detection in one device
- **Ultra-Low Power:** Uses less than 1 μA in lowest power mode
- **Compact & Robust:** 3x3 mm VQFN; -40°C to $+125^{\circ}\text{C}$ operation
- **Enhanced Configuration:** Fine-tune detection thresholds, sleep intervals and more through GPIO settings or UART interface
- **Self-Monitoring:** Heartbeat output provides failsafe system feedback
- **Energy Compliant:** Supports global low-power regulations

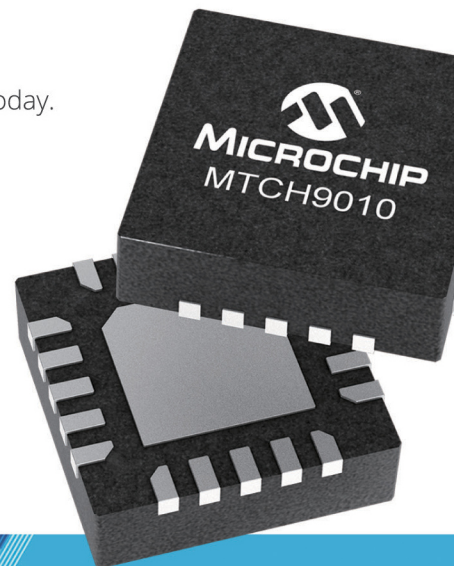

Discover how the MTCH9010 can safeguard applications such as home appliances, HVAC systems, home security, automotive and more — visit www.microchip.com/liquid-detection to explore the device and evaluation kit today.
