GNSS disciplined oscillator modules

Microchip Technology launches a new line of GNSS disciplined oscillator modules, designed to deliver precise, reliable timing for aerospace

and defence applications. Compact and highly reliable, they combine atomic clocks and advanced oscillators, supporting radar, SATCOM, radios, and vehicle platforms, even in GNSS-denied environments. The portfolio enables seamless integration, trusted performance, and rapid deployment, acting as stand-alone subsystems or part of larger PNT systems.

Embedded OS

SECO launches Clea OS 2.0, a hardware-agnostic embedded OS designed to power next-gen smart devices with ease and security. It simplifies development, boosts AI performance, enables remote updates, and ensures compliance with emerging regulations. OEMs can innovate faster, cut costs, and protect devices with built-in cybersecurity, LTS support, and flexible lifecycle management,

future-proofing smart hardware effortlessly.

MANUFACTURING EQUIPMENT & MATERIALS

Touchless fibre optic cleaner

MicroCare unveils the Sticklers Pro360° touchless cleaner, redefining fibre optic maintenance. Its 360°

touchless cleaning removes dust, oil, and residues without scratches, ensuring first-time-right performance. Compact and versatile, it handles multiple connector types with ease, offers over 2100 cleans per fluid canister, and meets global safety standards, making high-speed networks cleaner, faster, and more reliable than ever before.

TEST & MEASUREMENT

Wideband amplifiers

Rohde & Schwarz has expanded its broadband amplifier family with new dual-band models reaching up to 18GHz. The BBA300 series delivers compact, wideband power in desktop form, built for flexibility, reliability, and high availability. Supporting diverse test needs from EMC compliance to wireless applications, these amplifiers combine strong linearity with adaptable performance for modern engineering and production environments.

Wafer level and back end inspection solutions

TRI expands its inspection and metrology solutions to meet the fast-changing needs of advanced semiconductor

manufacturing. From wafer bumping and chip-on-wafer to mini-LED and ultra-fine paste inspection, TRI's TR7950Q SII, TR7007Q SII-S, and TR7900Q SII-R provide precise 3D and micro-scale inspection. By combining optical, X-ray, and AI-driven metrology, TRI enables manufacturers to enhance yield, quality, and process control.

Multichannel GHz digitisers

Spectrum Instrumentation unveils the DN6.33x series, its most advanced multichannel GHz digitisers. Offering up to 12 channels and high-speed sam-

pling, the lineup delivers precise, time-aligned measurements for complex signals. Compact, flexible, and easy to integrate, these digitisers cater to aerospace, research, and semiconductor testing, enabling accurate, high-resolution data capture with intuitive software and seamless developer support.

HDMI test solution

Keysight Technologies has unveiled its new HDMI test solution, designed to

simplify validation and compliance for next-gen video and audio devices. The system automates the testing of
