

India's July trade gap hits \$27.35 billion high

India's trade deficit hit an eight-month high of \$27.35 billion in July as imports of petroleum, electronics, and machinery outpaced export gains. Exports rose to \$37.24 billion, led by electronics, as well as engineering and pharmaceuticals, but imports surged to \$64.59 billion. Even with the US tariffs looming and energy risks escalating, officials remain optimistic about the momentum in September exports.

US enforces 50% tariffs on Indian exports; electronics spared

On August 27, the US imposed steep 50% tariffs on key Indian exports, including textiles, gems, leather, machinery, and marine products under President Trump's order targeting Russia-linked trade. Electronics, autos and pharma are exempt, shielding India's fast-growing tech exports. Experts warn of heavy losses in labour-intensive sectors. India promises relief measures while vowing to protect farmers, SMEs, and jobs.

Government plans \$20 billion outlay for ISM 2.0

India's semiconductor push may get a \$20 billion boost, with MeitY seeking Cabinet approval by December to double incentives under the second phase of India Semiconductor Mission (ISM). The plan targets fabs, design, and packaging, benchmarking against US and EU schemes. Projects like Tata-PSMC and Micron are underway, with the first fabs expected to be operational soon this year. Experts flag global competition and high costs.

India's non-smartphone electronics exports cross \$14 billion in FY25

India's electronics exports hit a record \$38.57 billion in FY25, up 32.47% YoY, with non-smartphone products crossing \$14 billion. Key drivers included inverters, telecom gear, photovoltaic cells, and PCs. Tamil Nadu led in exports. Backed by chip investments, PLI schemes, and ECMS rollout, India aims for \$200 billion in electronics exports by 2030, strengthening supply chains and reducing imports.

India ramps up critical minerals drive with global tie-ups

India is accelerating its critical minerals strategy with a war chest of more than ₹45 billion for overseas acquisitions and stockpiles, claimed G. Kishan Reddy, Union Minister of Mines. Among the current joint ventures, Khanij Bidesh India Ltd (KABIL) has partnered with the UAE's IRH and Russia's Uranium One for uranium and rare earths, while advancing lithium projects in Argentina and scouting for opportunities in Australia and Africa. The new MMDR Act changes enable larger funding, thereby bolstering EV and green energy security.

CG Semi's landmark OSAT pilot line takes off in Gujarat

India inaugurated its first OSAT pilot line in Sanand, Gujarat, under CG Semi, which is a JV of CG Power, Renesas, and

An "AWESOME" Development Board from India?

- **Super Small:** 3 centimeters
- **Super Smart:** 3 processors (Xtensa® Microprocessor + 2 ULP RISC-V Coprocessor)
- **Super Sensitive:** 5 Sensors
- **Super Connected:** Wifi & 10+ Interfaces
- **Super Flexible:** 30 GPIOs
- **Super Easy:** FPC + Dedicated Battery Connector
