

SNIPPETS

- India's ₹181 billion battery PLI faces major hurdles, prepping for review
- LG Electronics to finally launch its India IPO in October
- SEBI proposals aim to boost mega IPOs, ease market strain
- Ashok Leyland to invest 50 billion in battery localisation with CALB
- DE-CIX becomes the first to integrate Starlink in India
- Xiaomi to target the European EV market by 2027
- IIT Bombay and Nagpur University drive critical minerals push for semiconductors
- Semiconductor startup Netrasemi raises \$12.5 million
- Cadence uses Nvidia hardware to speed power analysis for AI chips
- L&T Semiconductor sets \$500 million revenue target before IPO
- Honor set to manufacture smartphones in India by 2026

Stars Microelectronics, with ₹76 billion investment. The G1 plant starts with 0.5m units/day, scaling to 14.5m by 2026 via a second site, creating 5000+ jobs. Minister Vaishnav hailed it as a milestone for the India Semiconductor Mission.

Tamil Nadu launches subsidies to promote fabless chip design firms

Tamil Nadu has launched a semiconductor design promotion scheme under its ₹5 billion Semiconductor Mission 2030, offering subsidies, prototyping grants, and training support to fabless firms. CoEs with TIDCO and universities will boost testing and research. Approximately 1000 students will be trained, with some sent abroad, as the state aims for a comprehensive chip ecosystem.

Odisha launches policy to boost electronics component manufacturing

On August 25, Odisha approved its Electronics Component Manufacturing Policy, 2025, aligning with the Centre's ECMS to boost domestic electronics production. Incentives include up to 50% capital subsidy, power duty exemptions, and tailored benefits for mega-projects. Alongside the IT Policy, 2025, Odisha aims to create high-skilled jobs and strengthen its role in electronics and tech sectors.

Draft Telecom Policy 2025: India eyes 50% import substitution

India's draft National Telecom Policy 2025 targets 100% 4G, 90% 5G, and 80% tower fibre-isation by 2030, while boosting local manufacturing and cutting imports by half. VoICE seeks mandatory indigenous gear, a 'Rip and Replace' of Chinese equipment, and ₹200 billion R&D grants. COAI, however, opposes direct enterprise spectrum allocation, citing revenue and security risks.

RRP Electronics gets land for semiconductor fab in Navi Mumbai

RRP Electronics has secured 100 acres in Navi Mumbai to set up a ₹120.35 billion semiconductor fab, relocating its Texas unit. Backed by Maharashtra CM Fadnavis, the project aligns with ISM, promising jobs, supply-chain strength, and a wafer capacity of 125,000 per month. Construction

DIY KIT: Agriculture IoT & AI

Want to create exciting IoT projects for agriculture use cases or agri-IoT projects?

This kit provides everything you need to create typical IoT for agriculture (aka agri IoT) projects.

KIT INCLUDES:

- Soil Sensor
- GSM Module
- Relay Module
- IndusBoard Coin

POWERED BY

IndusBoard
COIN

Super small sized development board that enables you to create solutions for many use-cases where small size is super important.

SPECIAL INTRO PRICE

₹2,149 (Inclusive of GST)
