port corporate purposes. The IPO, conducted through book-building, includes employee reservations, pre-IPO placement of up to ₹3 billion, and allocations for institutional, non-institutional, and retail investors.

Vedanta invests ₹125 billion to boost EV metals

Vedanta Limited plans a ₹125 billion investment to expand metals capacity for EVs, covering aluminium, zinc, nickel, ferrochrome, and steel. Projects include the expansion of an aluminium smelter, zinc alloy and roaster plants, as well as low-carbon metal production. Vedanta aims to support EV components like batteries, motors, and frames, while exploring rare earths and other critical materials for India's growing EV sector.

PM Modi marks two-day visit at SEMICON India 2025

At the beginning of September, Prime Minister Narendra Modi inaugurated SEMICON India 2025 in Delhi, unveiling India's first indigenous microprocessor. He highlighted \$18 billion in chip investments, the first commercial chips by 2025, and ISM 2.0 plans. The event drew 2500 delegates, 350 exhibitors, and global CEOs, underscoring India's semiconductor ambitions and talent strength.

Made-in-India chips unveiled at SEMICON include four from West Bengal

At SEMICON India 2025, West Bengal contributed four of the first 33 'made-in-India' semiconductor chips: C2S0007 (IIEST Shibpur), C2S0001 and C2S0048 (University of Calcutta), and C2S0029 (NIT Durgapur). Developed under the Chip-to-Startup and DLI schemes, these chips highlight India's push for indigenous design. Alongside it, ISRO's VIKRAM3201 processor, a 32-bit chip for space launch vehicles, was also unveiled.

ILJIN Electronics secures ₹12 billion to boost EMS

ILJIN Electronics (India) raised ₹12 billion in a strategic funding round from ChrysCapital and InCred Growth Partners to scale its manufacturing operations, enhance technology, and drive acquisitions, including Power-One Micro Systems and Unitronics. Serving the EMS needs of the consumer, automotive, telecom, defence, and renewable sectors, ILJIN aims to capitalise on India's \$80 billion EMS growth and reduce import dependence.

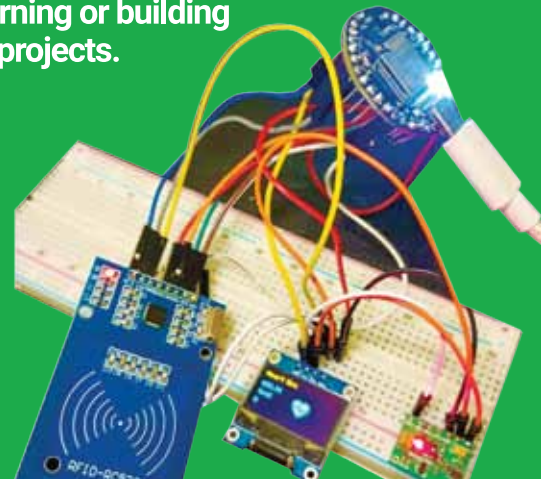

Six firms unite to push India's semiconductor ecosystem

Six firms, 3rdiTech, Kaynes Semicon, SPARSHIQ, SENSESEMI, Focally, and NXP, have formed a consortium to build India's semiconductor and vision systems ecosystem. Covering chip design, packaging, optics, firmware, and system integration, the group targets vehicles, defence, surveillance, and industrial electronics. The initiative aims to cut import reliance, strengthen local manufacturing, and align with government semiconductor programmes.

DIY KIT: NFC, RFID, IoT & Embedded Systems

Want to learn and master NFC and RFID technology along with an IoT-enabled embedded system?

This kit includes all the essentials to start learning or building RFID/NFC projects.

POWERED BY

IndusBoard
COIN

Super small sized development board that enables you to create solutions for many use-cases where small size is super important.

SPECIAL INTRO PRICE

₹1,999 (Inclusive of GST)
