

imaging in challenging lighting conditions. Built with Sony STARVIS 2 technology and e-con's ISP tuning, it delivers sharp visuals from dim

parking basements to bright medical spaces.

ONVIF compliance ensures easy integration, while PoE support, secure cloud management, and a durable IP67 build make it ideal for surveillance, traffic, sports, and precision industrial applications.

EMBEDDED

30W AC/DC power supplies

RECOM has expanded its compact RACM30-K AC/DC power supply series with new 36V, 48V, and 54V DC outputs, up from the earlier 24V

limit, unlocking applications from PoE+ injection to advanced medical devices. Offering

30W of power in a compact footprint, it is globally compatible, medically certified, and designed for rugged environments. Multiple mounting formats, wide temperature tolerance, and a 3-year warranty make it a safe, scalable, and flexible power solution.

Motherboard

ADLINK has launched the AmITX-RL-WV Mini-ITX motherboard, designed for industrial systems facing unstable power conditions. Supporting 12-28V

DC input, it ensures reliable uptime in automation, transport, kiosks, and medical carts. Compact yet powerful,

it supports high-speed expansion, fast networking, and broad connectivity for modern and

legacy devices. Ideal for AI, machine vision, and real-time control, it delivers dependable performance in demanding industrial environments.

Compact power supply

IBASE CP100 delivers compact power for space-tight industrial setups. Built for reliability, it's perfect for automation, retail, logistics, and embedded applications. Has small DIN-rail-

mount design with dual 4K display, four COM ports, and M.2 slots for wireless, 5G, or storage

expansion. Benefit: Boosts efficiency, connectivity, and scalability for long-term edge computing in mission-critical operations.

Development board

Nuvoton's NuMaker-UNO-M4 board combines an Arm Cortex-M4 microcontroller with Ethernet, multiple

communication ports, and an Arduino Uno form factor for quick integration. Ideal for IoT, automation,

and monitoring, it supports local data logging via SD card, USB programming,

and popular development tools. With built-in security, AI-ready processing, and example code, it provides professionals and hobbyists with a cost-effective and easy-to-use platform for connected applications.

Developer kit for AI-powered solutions

ASRock Industrial's Nvidia Jetson AGX Orin developer kit brings high AI performance to edge, robotics, and industrial applications. Supporting multiple cameras, PoE ports, and expansion

slots for storage and connectivity. Suitable for robotics, drones, retail, and smart city systems, it offers

secure operation, flexible I/O, and scalable options for developers building advanced AI-powered solutions.

MANUFACTURING EQUIPMENT & MATERIALS

Water-based flux

Emil Otto's EO-M-026 flux transforms the soldering of nickel-based alloys, especially nitinol. The water-based, VOC-free formula combines power-

ful inorganic activators with advanced additives for excellent wetting and minimal residue.

Non-flammable and safe to handle, it supports multiple application methods, delivering strong, clean bonds for medical, aerospace, robotics, and precision manufacturing where
