

Next Generation STT-MRAM for fast and efficient memory Fabless memory IC Company in South Korea

New Evolution of Technology and SOLution

Our India Distributor V5 Semiconductors is participating in upcoming Expo - Electronica India 2025

electronica India Stall#: A21, Hall# 2

September 17-19 2025, Location: BIEC, Bengaluru, INDIA

STT-MRAM

- ▶ High density (1Mb ~ 64Mb) with Samsung Foundry 28nm wafer Technology.
- ▶ High endurance and read "unlimited"
- ▶ Power Loss Protection: Ideal for event logging and data backup on unexpected power failure
- ▶ Eliminates battery & capacitor backup
- ▶ Replaces MRAM, FeRAM, Low-power SRAM and nvSRAM
- ▶ Ideal Applications: PLC, Industrial Motor Control, Medical, Data center, Banking system and smart Energy Meters.

Async. Fast SRAM

Asynchronous Fast SRAM

1 Mb–32 Mb | 8–12 ns Access time | VCC 1.65–3.6 V |
Rapid Delivery & Expert Support

BHAGYASHREE
INDUSTRIES

Looking for EV Chargers Technology Transfer?

Transfer Includes

- ▣ Product specifications
- ▣ Bill of Materials (BOMs)
- ▣ Schematics
- ▣ PCB Gerber files
- ▣ Mechanical drawings for IP-based enclosures
- ▣ Packing drawings
- ▣ Firmware source code
- ▣ Design evaluation reports

Additionally, We will provide:

- ▣ Production test equipment list
- ▣ Product test schedules
- ▣ Product assembly instructions
- ▣ Jigs and fixtures
- ▣ Training

Bhagyashree Industries experts in Power Electronics with 30 years of experience in Designing and Manufacturing power electronic products.

We have developed a range of IP65-compliant EV chargers suitable for two and three-wheeler.

Key Features

- Microcontroller-based design with Power Factor Correction (PFC)
- Low Total Harmonic Distortion (THD)
- High Efficiency
- Compliant with AIS156 standards
- CAN 2.0 integration
- EMI/EMC compatibility
- Input and Output protections
- IP65 Compliant

Technology Transfer Opportunity

We are offering a complete technology transfer for the ready manufacturing of EV chargers.
