BENGALURU

WHERE RUGGED MEETS READY: BENGALURU'S ELECTRONICS EDGE

The spotlight was on durability as Mouser Electronics brought its 4-city roadshow to its final destination, Taj MG Road, Bengaluru, on 17 July 2025. The theme being Resilience in Extremes with Rugged Electronics, the event made way for engineers to explore cutting-edge approaches to designing electronics that thrive in harsh environments. From aerospace and defence to industrial and outdoor applications, sessions tackled thermal management, shock resistance, and sourcing to MIL-STD and IP-rated standards, equipping attendees with the know-how to build electronics that endure the toughest conditions. For Bengaluru, already a tech and talent hub, it was a deep dive into the art and science of resilience.

The Delegates

Maneesh Soni,
Yantram Electronics

SESSION TITLE	SPEAKER
Electronics That Endure: A Product Perspective	Maneesh Soni
Reliability in the Real World; Rugged Solutions	Navneet Vинаik
Technologies to Improve Power Efficiency and Reliability	Sai Kumar
Thermal Interface Material & Practical Approach on Shielding	Vamsi Krishna Gajula, Harshit Kumar, Bibhu Shankar Sahu
Open House Q&A & Vote of Thanks	

Vamsi Krishna Gajula,
Würth Elektronik
