

This electric car will save
us money **in the long run**.
[eventually, after a long time]

I really hope this isn't the
shape of things to come.
[the way things are likely to
develop in the future]

Having an internet connection
is vital in this **digital age**.

digital age

[an era based on digital information,
when technology is dominant]

Have you seen the **latest
model** of their smartphone?
It's amazing!

the latest model

[the most recent version of a product]

Her design won an award
for technical **innovation**.

innovation

[a new invention or idea]

The team made an important
medical **breakthrough**.

breakthrough

[an important discovery or achievement]

The internet has seen a **revolution**
in communication.

revolution

[a huge change in ideas
or methods]

She has a new kitchen filled
with **state-of-the-art**
appliances.

state-of-the-art

[the most modern and up-to-date]

We need to **future-proof**
the design, not just look
at today's market.

future-proof

[design something to work in the
future, even if technology changes]

That company is famous for
its **cutting-edge** design.

cutting-edge

[extremely modern and innovative]
